PROFESSIONAL SUMMARY

I'm a recent graduate with almost a year of experience in the IT consulting and services industry. My main technical skills are with HTML, CSS, JavaScript, PHP, SQL, Git and GitHub. As someone not yet long-lived in this industry, I have a strong desire to grow my technical skills by personal action and through professional settings. My soft skills shine in areas such as communication, time-management, detailed-oriented, the ability to break down a large task into manageable tasks and being able to work alone or with a team.
